

# PARKING LOT LIGHT 75W-230W

100+ Patent Certificates\$1,000,000+ Annual Energy Saving10,000+ Projects Successfully Installed

10 EXPERIENCE www.aokledlight.com

## > Features of PLA Series

PLA series is an economical energy-saving and flexible application scenarios area light with high-cost performance. It is designed for commercial and industrial applications, providing cooler operating temperatures, brighter light and longer LED span.

- · CCT & power adjustable (75W/100W/150W).
- Light engine is thermally isolated from driver components for better heat dissipation, industrial-level design standard.
- Micro-lens systems produce IESNA Type III, Type IV and Type V distributions, full cutoff type, no uplight pollution.
- Luminaries produces 0% total lumens above 90° (BUG Rating, U=0), provides uniform light output with a lower glare.
- · Optical systems maintain an IP66 rating.
- The top spot of the fixture is reserved for the sensor in the case of future installation.

100-277V 277-480V 50/60HZ

# Change at the flip of a switch • REDUCE SKUS • INCREASE TURNS • DRIVE PROFITABILITY

With the simple push of a button, adjustable CCT LEDs are able to change between different temperatures of white light. This feature allows one fixture to have multiple white tones, ranging from warm, to daylight, to cool. Instead of ordering multiple lights with different color temperatures, order one adjustable CCT product that carries multiple options within itself. Install the fixture, and change the color temperature until it's right. This versatility enables contractors to lower their SKUs, while still offering variety and adapting to client needs. It gives business owners and designers the ability to independently change tones to create a certain atmosphere and easily coordinate fixtures.

# > Photometric Design

- Optimized, premium optical grade Mitsubishi polycarbonate lens, the efficient design of the modules make each light engine highly customizable, allowing the light distribution to be aimed toward the application.
- Optical systems allow for versatility, tight cutoffs, and flexible control for a wide variety of applications.
- We deliver innovation and customization, further expanding the flexibility of the project. Exceptional uniformity and low glare for maximum comfort and neighbor-friendly.

## > Flexible Installation

• Up to 7 installation methods (brackets) can be suitable for different installation scenarios, quickly adapt to the needs of the project. Convenient and Flexible.

Slipfitter

Type C Adjustable Yoke Mount Arm Mount

Type D Slide & Lock Mount

Type E

Sauare Pole

Mount

Type F Round Pole Mount

Type G Trunnion Mount

A sensor mounting hole is reserved on the top to facilitate future installation.

## **Outdoor luminaire with Zhaga receptacles** (optional)

## > Control Systems

## **Custom Dimming Profile**

Intelligent luminaire drivers can be programmed with complex dimming profiles. With customized combinations of time intervals and light levels are possible. This feature does not require any extra

The period between switching on and switching off is used to activate the preset dimming profile. The customised dimming system generates maximum energy savings while respecting the required lighting levels and uniformity throughout the night.

## **Daylight Sensor / Photocell**

Photocell or daylight sensors switch the luminaire on as soon natural light falls to a certain level. It can be programmed to switch on during a storm, on a cloudy day (in critical areas) or only at nightfall so as to provide safety and comfort in public spaces.

## **Motion Detection**

In places with little nocturnal activity, lighting can be dimmed to a minimum most of the time. By using passive infrared (PIR) or Microwave sensors, the level of light can be raised as soon as a pedestrian or a slow vehicle is detected in the area.

Each luminaire level can be configured individually with several parametres such as minimum and maximum light output, delay period and ON/OFF duration time. Motion sensors can be used in an autonomous or interoperable network.

PIR sensor

Timing control

### **Mounting Options**

Type A Slipfitter

Type B Adjustable Arm Mount

Type C Yoke Mount

Type D Slide & Lock Mount

Type E Square Pole Mount

Type F **Round Pole** Mount

Type G Trunnion Mount

#### Other Accessories

#### Quick connection terminal

Ratings per IEC/EN Ratings per EN 60664 Nominal voltage (II/2): 400V Rated surge voltage (II/2): 4 kV Ambient temperature (operation): +40 °C Continuous operating temperature: 85 °C Rated current: 32A Legend (ratings): (II / 2) Overvoltage category II / Pollution degree 2

#### Tool-free Waterproof Connector (2-pin/3-pin/4-pin optional)

Thread clamp silicone

Unit: mm. Total length of assembly: 108 (REF)

IP rating: IP68 Rated voltage/current: 400V/24A Test voltage: 2500VAC Square number of applicable line: 0.5-2.5mm2 Working temperature: -40~+105°C

Wiring range A=Ø14, cable Ø: 10~14mm A=Ø12, cable Ø: 9~12mm A=Ø8.5, cable Ø: 5~9mm

\*As the products are upgraded, the accessories may differ from those described in the pictures. Please consult with our sales team for updated details and order separately.
